

PREMIUM COMPOUND FERTILIZER

Mbio Plus 15/3/20/2MgO +20% Mbio Biochar (SOP BASED)

FORMULATED WITH Mbio BIOCHAR FOR LONG TERM SOIL ENRICHMENT

Mbio Plus NPK 15/3/20/2 MgO + 20% Mbio Biochar (SOP Based) is a premium compound fertilizer specially formulated for durian cultivation. It enhances strong root establishment, improves nutrient uptake efficiency (NUE), and supports better fruit filling, improved pulp quality, and consistent fruit development. Enriched with biochar, it improves soil structure, moisture retention, and microbial activity making it ideal for high value durian plantations seeking superior yield quality and long-term soil health.

Recommended Application Methods

Suitable for	Matured Durian Trees (4 years and above) and other fruiting crops
Application Method	• Ring application or broadcasting around canopy drip line. • Light soil incorporation is recommended for better nutrient absorption.
Usage Rate	2-4 kg per tree • Apply 3-4 times per year (pre-flowering, fruit setting, post-harvest) • Adjust based on tree age, soil condition, and yield target.

Benefits of Mbion Biochar

- ◆ Enhances strong root growth for better nutrient absorption
- ◆ Improves pulp thickness, texture, and taste quality
- ◆ Improves soil structure and moisture retention
- ◆ Supports consistent fruit development and uniform size
- ◆ Suitable for premium durian varieties and high-yield plantations
